Will play a vital role in managing the functions of the ICT area and key responsibilities involved in the job among others are:

- Management of technology framework, architecture and ICT strategy to facilitate operational excellence.
- Implementing new value added applications by facilitating new business strategies within set time frame.
- Evaluate and ensure that all ICT assets are up to date in terms of latest technological trends in the market.
- Recruit and retain appropriate talent to support ICT initiatives.
- Effectively manage technology vendor relationships.
- Ensure ICT infrastructure is in place to meet the company's current and future requirements including operational efficiency, systems integrity and disaster recovery programs.

Chief Digital Officer

MSL Ref. No. 7511

Will integrate new technology and digital channels with core systems to;

- Develop and implement the transformational ICT roadmap in line with the new business and customer strategies.
- Enhance the company's digital assets related to customer delivery.
- Recognize customer needs, market trends connected to digital delivery of company products and services.
- Collaborate with all businesses to initiate new technology that supports transformational business strategy.
- Offer unparalleled customer experiences at all digital delivery touch points.
- Transform operational processes with digitalization to deliver efficiency and cost savings.
- Translate business requirements into timely, cost effective technical solutions.

Experience & Qualifications;

- Possess at least 15 years' managerial experience out of which minimum 5 years at Senior Management level.
- Dynamic leadership skills with the ability to motivate and retain talent.
- A degree or a professional qualification in ICT.
- Rich mix of business management & technology would be advantageous.

An attractive remuneration package on par with the market.
